

Low Carbon Housing: developing a baseline for refurbishment in the West Midlands

March 2009

CD ROM Summary Table

| Tab heading | Contents |
|---|---|
| Social housing refurbishment | Total number of social households refurbished by LA or RSL and HMA, and number of estimated energy efficiency refurbishments 2007–2008. |
| Private housing refurbishment | Total number of private households refurbished by scheme and LA, and HMA (LA grants, Warm Front and energy supplier schemes) 2007–2008. |
| Social housing spend | Spend on social housing refurbishment by LA or RSL and HMA, and estimated spend on energy efficiency refurbishment (Decent Homes) 2007–2008. |
| Private housing spend | LA and Warm Front spend by LA and HMA 2007–2008. |
| All measures scheme and LA | Number of energy efficiency measures installed by LA, scheme, housing sector and measure 2007–2008. |
| All measures LA | Total number of energy efficiency measures installed by LA and HMA, housing sector and measure 2007–2008. |
| EEC2 measures LA | Total number of energy efficiency measures installed as part of Supplier Obligation programmes (EEC2) 2007–2008 by LA and HMA. |
| Warm Front measures LA | Total number of energy efficiency measures installed as part of Warm Front 2007–2008 by LA and private housing sector (owned and privately rented). |
| Defra household energy use 2006 | Total household energy consumption by fuel type by LA and HMA 2006 in GWh. |
| Defra CO ₂ NI186 statistics 2006 | Total CO ₂ emissions from households as reported for NI186 by LA and HMA 2006. |
| Total number of households 2007 | Total number of households by housing sector, LA and HMA at 31st March 2007. |
| Cost CO ₂ and kWh assumptions | Cost, kWh saving and carbon content per kWh of fuel saved assumptions by energy efficiency measure. |
| Monitoring spreadsheet | This spreadsheet may be used to track the energy saving (kWh) and CO ₂ emissions reductions (kg and tCO ₂) of measures installed via refurbishment schemes. The spreadsheet is linked to the tables in Cost CO ₂ and kWh assumptions and columns F to J automatically calculate when columns B to E are filled. |
| RSL groups by no. dwellings | West Midlands RSLs grouped by total number of households. LA social housing by status (LSVT, ALMO or retained). |
