Catchment Abstraction Management Strategies	The Environment Agency
Technical Analysis undertaken by DTA/ABP on the Operational Strategy for a satellite RELS – Nov 2004	
The West Midlands Town Interventions Study	Ancer Spa consultants 2003 (on behalf of AWM)

In order to develop the Options, there needs to be a robust evidence base. It is stated in the Project Plan that the “*RPB is encouraging an open door approach to technical work*”; therefore, consideration must to be given to the availability and use of additional technical evidence brought to the attention of the RPB during the Revision process.

The table above shows a list of all additional technical work/studies that have been brought to the attention of the RPB during draft Project Plan public consultation (November/December 2005).

The list does not include any of the technical studies that are already mentioned in the Project Plan or the work that forms part of the Section 4(4) responses – these are already freely available on our website.

Placing this list on the website will ensure that a register of additional technical work will be readily available to all members of the RPB Secretariat and RSS Policy Leads who may, if they decide it to be relevant, feed the information into the development of Spatial Options. The list will also be available to other parties.
